

As Orzaks Pharmaceuticals, we started to operate in 2004 with the gathering of pharmacists, physicians, and investors with professional knowledge and experience.

With the increasing need for natural nutrition, which is essential for a healthy life but cannot be reached in today's conditions, we set off with the slogan of "Gift to Health", and with the awareness and responsibility of presenting our products to the end consumer, we expand our portfolio day by day and offer more than 150 product types to the consumers.

In 2012, to meet our increasing sales and production volume, we established our factory equipped with modern production technologies in accordance with GMP and ISO 22000: 2018 Food Safety standards. As Nuvita and Orzaks Pharmaceuticals, we develop innovative products for both our companies, our country, and our domestic and foreign customers in our production facility, which started operating in 2020 with our formulation and technology development mission and has TSE COVID-19 safe production certificate. In order to support and encourage the employment of R&D personnel and qualified workforce, as the Nuvita R&D Team, we were entitled to receive the R&D Center Certificate issued by the Ministry of Industry.

In our production facility, we are working on realizing the production of raw materials that are not produced in Turkey and needed by the sector. As the first step of this, we carry out the first probiotic production of Turkey in our factory as Nuvita Pharmaceuticals. We cooperate with the raw materials with patented and clinical studies at international standards supplied from the leading raw material manufacturers in their field, and we carry out the entire process under control until the delivery of our products to the end consumer by avoiding auxiliary materials as much as possible.

After reaching the target market share in Turkey, we implemented the "Opening to Global Markets" project, which is a part of our target. In 2016, we started to introduce our 'Ocean Fish Oil' brand, which is the flagship of the omega 3 market in Turkey, and our other brands, with the people in especially Moldova, Romania, Belarus, Vietnam, Azerbaijan, Syria, Iraq, Russia, Libya, Lebanon, Qatar, Jordan, Yemen, Kosovo, Cyprus, the Netherlands, the United Arab Emirates, Sudan, Albania, the Netherlands, Bahrain, Uzbekistan, and Tunisia. We work hard to become an international player by combining our goals with our sustainable marketing activities.

In 2018, we became the leading company of OTC. We continued our leadership in 2019 and 2020.

As Orzaks Pharmaceuticals and Nuvita Pharmaceuticals, we will always continue to produce pioneering products for you and to give "a gift to health"...

Thank you for trusting and choosing us on this journey.

Regards,
Orzaks Pharmaceuticals

OMEGA 3 CATEGORY

Why is omega 3 so important?

Fats which are an indispensable source of energy for life, not only produce energy but also takes place in our cells, as many hormone and hormone-like structures.

Omega 3 is one of the most important fatty acids. Omega 3 fatty acids, which are the basic need of the body for a lifetime, should be taken from reliable sources at the correct concentration.

Why Ocean brand is everyone's number one choice for Omega 3?

Because Ocean Fish Oils are produced in accordance with international quality standards.

EPA (Eicosapentaenoic acid) and **DHA (Docosahexaenoic acid)**, some of the important Omega3 fatty acids found only in fish and other marine organisms (shrimp, cuttlefish, algae, etc.), proved to be beneficial for the cardiovascular system, brain, eye, skin, joints, and cancer.

1

In order to maintain its omega 3 values, fish oil is processed within 24 hours within the EU * freshness and hygiene standards.

2

Solvents and chemicals are not used, mechanical methods are preferred.

3

Purified by molecular distillation technique.

4

Fish taste and odor are removed with high deodorization technique.

5

Stability is achieved by using natural antioxidants.

*EU : European Union

Omega 3 in International Quality Standards

The purity and quality of Ocean are tested by **IFOS (International Fish Oil Standards)**, an independent institution. Ocean Fish Oils; are analyzed according to determined limiting values and officially registered 5 stars by the **Council for Responsible Nutrition (CRN)** and **World Health Organization (WHO)**.
